A digital mediation tool

Available in French and English, this app was developed by smArtapps and by Studio Vert Foncée for the audio content. This digital mediation tool accompanies the Île-de-France prehistory museum visit. It is free and can be downloaded from GooglePlay and iTunes or directly in the museum lobby.

- [Download the app from Google Play](https://play.google.com/store/apps/details?id=fr.museeprehistoire.ANDROID)(<https://play.google.com/store/apps/details?id=fr.museeprehistoire.ANDROID>)

Two tours

This application, which has 400 images, contains two tours: one of the archaeological collections, the other of the architecture. The first is an hour of commented tour of the rooms in chronological order. The second is a 30 minute stroll in and around the museum.

For a more in-depth visit of the collections, the application allows you to discover certain objects that are characteristic of the main prehistoric period using information sheets. Finally, the application contains a glossary to understand specialised terms.

The museum team wishes you an excellent visit.
